The following is an examiner's statement of reasons for allowance:

The 37 CFR 1.132 declaration on pages 6 and 8 and Appendix A provides evidence that Example 12 of the closest prior art to Albayrak et al. wherein a methylidenemalonate monomer is polymerized in the presence of a polyethylene oxide (i.e. Pluronic F<sup>®</sup> 68) does not yield methylidenemalonate recurring units and hydrophilic units embracing polyethylene oxide in the form of the claimed copolymer. The mass spectra in Appendices A-1 and A-2 show the lack of covalent bonding between the methylidenemalonate and polyethylene oxide according to the preparation process of Example 12 of Albayrak et al.

The claimed copolymeric structure is obtained via anionic or radical polymerization in the presence of an initiator, or the coupling of precursor sequences in the presence of a catalyst (specification, pages 5, 8 and 12).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
